#### **DETAILED ACTION**

#### Drawings

- 1. Figures 1 and 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- 2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "11" has been used to designate both "cylindrical portion" and "bearing mounting plate". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Objections

3. Claims 7-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, claims 7-13 have not been further treated on the merits.

4. Claims 1-7 are objected to because of the following informalities: "the said" should be either –the-- or –said--. "the use of a replacement sector shaft nut" should be --a replacement sector shaft nut--; "the use of a mounting arrangement" should be --a mounting arrangement--. Appropriate correction is required.

# Specification

5. The specification is objected to because reference character "11" has been used to designate both "cylindrical portion" and "bearing mounting plate". Correction is required. See MPEP § 608.01(b).

## Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/774,655

Art Unit: 3616

Regarding claim1, the phrases in quotation for example "re-circulating ball" or "worm and sector" renders the claim indefinite because it is unclear whether the phrases in between the quotation are part of the claimed invention. See MPEP § 2173.05(d).

Claim 1 recites the limitation "said gear box sector shaft" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the vehicle frame rails" in line 7. There is insufficient antecedent basis for this limitation in the claim.

## Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1-3, as best understood by the examiner, are rejected under 35 U.S.C. 102(b) as being anticipated by Harkrader et al (U.S. 6,102,416).

Harkrader et al discloses a steering gear-box stiffener for use with a vehicle equipped with a steering gear-box (32), consisting essentially of an outboard bearing (42) to support a gear-box sector shaft (pinion shaft), a means of attaching (40) said bearing to said sector shaft by a replacement sector-shaft nut (64), a means of securing (60) said bearing to a vehicle frame in a proper location by a mounting arrangement generally comprised of a bearing mounting plate (46) and crossmember (18) rigidly

attached and spanning the vehicle frame rails (14A, 14B); in which said bearing mounting plate (46) is attached to an existing vehicle crossmember (18); in which the crossmember (18) is welded to said frame rails (14A, 14B).

## Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harkrader et al in view of Ruehl et al (U.S. 5,308,115).

Harkrader et al discloses every element of the invention as discussed above except that the crossmember is bolted to said frame rails by means of intermediary brackets suitably attached to said frame rails.

Ruehl et al teach the invention wherein the crossmember (226) is bolted to said frame rails (200) by means of intermediary brackets (228) suitably attached to said frame rails (200); wherein the crossmember and the bracket are constructed of steel or aluminum.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the vehicle frame of Harkrader et al by using the teaching of Ruehl et al in order to achieves cost and weight reduction for the vehicle.
